- Participation in the project «e-Government»;
- Corporate data network of East-Kazakhstan Tax Committee formation;
- Construction of «AES Sogrinskaya CHP» LLP video surveillance system with the using of wireless technologies;
- Satellite monitoring of mobile objects services

# Personal telecommunication infrastructure

From own funds our company created telecommunication network based on fiber-optic and wireless lines to provide modern communication services – digital telephone service, wide-band Internet access. The basic nodes of this network are located on the main ATS (automatic telephone station) of the city, an industrial site of New Sogra village, and on our private tower near broadcasting and transmitting house in Menovnoe village.

## Installation of continuous telecommunication network:

- «Rainbow» district – 2 Business Centers of «LIK» LLP and the 2 houses;
- Apartment houses on Permitina, 11A, st., «Zodiac» and «Bolashak» districts;
- «UK TMK» JSC («AES Sogrinskaya CHP» LLP, «Titan» PKF LLP) industrial zone enterprises.

## «E-Government»

From the beginning of «e-government» program adoption our company has taken an active part in its implementation.

The data channels were organized and based on it closed private network was built. Now more than 40 state agencies and institution of Ust-Kamenogorsk have the connection with this network.

Also the gateway for interfacing with community agencies of East-Kazakhstan region is built.

In 2005 our staff was create the official web-site of the head of East-Kazakhstan region [www.akimvko.gov.kz](http://www.akimvko.gov.kz), which is now also accompanied by us. The total number of governmental bodies and institutions Internet-sources created under the «e-government» is more than 30 web-sites.

# Organization of satellite corporate data network of EKR Tax Committee

In 2001, the company employees were carried out works in corporate data network organization based on PES 5000 HUGES manufacturing satellite transceiver stations, under the contract with satellite operator «KATELCO» JSC.

Firstly, preliminary examination and approval of station installation place was made, then works on satellite stations installation and configuration accomplished. Equipment is installed in: Ridder, Zyraynovsk, Zaisan cities, Akzhar, Samarskoe, Kurchum, Kokpekty, Bolshenarymskoe, Katon-Karagay, Georgievka, Karaul, Bolshaya Vladimirovka, Borodulikha villages.

After stations installation we have carried out mounted stations maintenance within 2 years.

# Satellite monitoring

Since 2009 «Vostok On-Line» LLP offers the new service – mobile objects monitoring with the using of GPS(GLONASS)/GPRS-technologies. Service is provided in partnership with Autosat company, St. Petersburg. Now our clients could control in real-time the location and routes of their vehicles, monitor the processes parameters.
